

Divyanshi Saini

Delhi NCR, India | divyanshisaini22@gmail.com | divyanshisaini.online | LinkedIn | GitHub

PROFESSIONAL SUMMARY

Full-stack software developer and Computer Science (AI/ML) graduate with experience building client-facing web applications, supporting API quality, and shipping Python systems. Comfortable working across user interfaces, backend services, data, testing, and deployment. Recent work includes API testing and design support at SaaS Banana, containerized Python tasks for a freelance AI engagement, and complete web projects delivered independently. Known for clear communication, ownership, and turning requirements into reliable software.

CORE SKILLS

Languages: Python, JavaScript, SQL, Java (basic)

Web Development: Django, Django REST Framework, Flask, FastAPI, React, HTML5, CSS3, responsive UI

Data and APIs: PostgreSQL, MySQL, SQLite, SQLAlchemy, Django ORM, REST APIs, JWT, OpenAPI, Postman

Testing and Delivery: API testing, Pytest, end-to-end testing, Docker, Docker Compose, Git, GitHub, Railway, Vercel

Additional: Celery, Redis, Gunicorn, PyTorch, scikit-learn, Pandas, NumPy

EXPERIENCE

Python Intern (API Testing & Design) at SaaS Banana

August 2026 - Present | Remote

- Test internal APIs across expected, invalid, and edge-case requests, including authentication and response behavior.
- Support API design reviews and documentation, and use Python scripts to automate repeatable endpoint checks.

Full-Stack / Freelance Developer at Self-Employed

2025 - Present | Remote

- Completed a July 2026 engagement sourced through Handshake AI, building containerized Python tasks and end-to-end tests that verified execution inside Docker.
- Delivered CuraLink, an AI-powered research website with a JavaScript interface and API-driven search and content workflows.
- Built and deployed complete web applications with FastAPI or Flask, JavaScript, PostgreSQL or SQLite, Docker, Railway, and Vercel while managing client communication and delivery.

Backend Developer Intern at ANV Tech Solutions

July 2025 - August 2025 | Remote

- Built REST APIs with Django and FastAPI for internal workflows, including validation, authentication, and clear error handling.
- Improved key endpoint response times by refining PostgreSQL queries and adding appropriate indexes.

SELECTED PROJECTS

LungCare+ at Full-Stack Healthcare Platform

FastAPI | PyTorch | JavaScript

- Built a web platform that accepts CT scan uploads and returns CNN-based lung cancer predictions with confidence information.
- Connected the JavaScript interface, FastAPI services, PyTorch inference pipeline, and PostgreSQL data layer, then deployed the application on Railway.

Paragraph Indexer API at Backend Search Service

Django | PostgreSQL | Docker

- Created an authenticated API for paragraph ingestion and ranked word-frequency search, with background processing through Celery and Redis.
- Designed efficient database queries, safe re-indexing, containerized services, and clear OpenAPI documentation for local or production use.

EDUCATION

B.Tech, Computer Science (AI/ML) at Moradabad Institute of Technology

August 2022 - June 2026 | 73%

CERTIFICATIONS AND RECOGNITION

HackerRank Basic Python | Java Full Stack, Ducat (2024) | First Prize, Smart Work Competition
