Divyanshi Saini

PYTHON BACKEND / SOFTWARE DEVELOPER

Delhi NCR, India | divyanshisaini22@gmail.com | Portfolio | LinkedIn | GitHub

SUMMARY

Python-focused software developer with hands-on experience building, testing, and debugging Flask/Django backends, REST APIs, and Dockerized services. Concurrently contributes to AI coding benchmark and model-evaluation projects while delivering full-stack applications with JavaScript, HTML, and CSS.

TECHNICAL SKILLS

Backend: Python, Django, Django REST Framework, Flask, FastAPI, REST APIs, JWT authentication
Data & async: PostgreSQL, SQL, Django ORM, SQLAlchemy, Celery, Redis
Engineering & web: Docker, Git/GitHub, Postman, Pytest, OpenAPI/Swagger, JavaScript, HTML5, CSS3
AI training & evaluation: Terminal-Bench, Harbor, benchmark task design, rubric-based evaluation, response scoring
Core strengths: Problem solving, debugging, attention to detail, analytical reasoning, written communication

EXPERIENCE

Python Developer Intern - **SaaSBanana Technologies** *Aug 2026 - Present | Remote*

- Build and test backend functionality across Flask and Django services, REST APIs, data flows, and authentication in Dockerized environments.
- Reproduce and debug issues, implement fixes, and validate endpoint and feature behavior through Postman-based API and regression testing.
- Contribute production-oriented changes through Git branches and pull requests; deliver small HTML/CSS/JavaScript fixes supporting end-to-end features.
- Test newly delivered features across backend and supporting frontend flows, document defects with reproducible steps, and retest fixes before merge.
- Inspect request/response payloads, status codes, authentication flows, validation rules, and edge cases to support reliable feature releases.

AI Coding Benchmark Contributor - **Handshake AI** *2026 - Present | Contract, Remote*

- **Handshake AI - Dynamo:** Author containerized benchmark tasks for coding agents using task specifications, reference solutions, pytest verifiers, and Docker environments; submit pull requests and iterate on review feedback.
- **Handshake AI - Octahedron:** Evaluate model responses against correctness, instruction-following, relevance, and quality rubrics; document clear, structured rationales for scoring decisions.

AI Training Contributor - **Outlier AI** *2026 - Present | Contract, Remote*

- Contribute to the Ether project through structured AI-training and evaluation workflows, applying project-specific rubrics and quality standards to submitted work.
- Review model outputs for correctness, instruction adherence, completeness, and consistency; record concise evidence-based evaluation rationales.

Full-Stack Developer - **Self-Employed** *2025 - Present | Remote*

- Delivered full-stack applications sourced through LinkedIn, building Python API backends and responsive JavaScript/HTML/CSS interfaces.
- Containerized services and deployed applications on Railway and Vercel while managing requirements, client communication, testing, and delivery.

Backend Developer Intern - **ANV Tech Solutions** *Jul 2025 - Aug 2025 | Remote*

- Built REST APIs with Django and FastAPI, adding request validation, authentication, and structured error handling for internal application workflows.
- Designed PostgreSQL schemas and improved key queries through indexing and query refactoring.
- Tested endpoint behavior and failure cases, verified integrated request/response flows, and resolved backend issues in collaboration with the remote development team.

SELECTED PROJECTS

LungCare+ | FastAPI, PyTorch, PostgreSQL, JavaScript | Live Demo

- Built a full-stack healthcare application with REST endpoints for CT-scan uploads, predictions, and patient data.
- Integrated a PyTorch CNN inference pipeline with preprocessing and confidence scoring; deployed the application on Railway using environment-based configuration.

Paragraph Indexer API | Django REST Framework, PostgreSQL, Celery, Redis, Docker, JWT

- Developed a JWT-secured bulk-ingestion and word-frequency API with asynchronous Celery/Redis indexing and idempotent rewrites.
- Optimized ranked search using a composite PostgreSQL index; containerized web, worker, beat, database, and Redis services with Docker Compose and exposed OpenAPI documentation.

CuraLink | JavaScript, API integration, responsive UI, Vercel | Live App

- Delivered an AI-assisted research interface with API-driven search and content-generation workflows, responsive frontend behavior, and production deployment on Vercel.

EDUCATION & CREDENTIALS

B.Tech, Computer Science (AI/ML) - Moradabad Institute of Technology, Moradabad | Aug 2022 - Jun 2026 | 73% **Certification:** HackerRank Python (Basic) | **Award:** First Prize, Smart Work Competition
